

Dear Michigan Economic Development Corporation,

As you know, Gotion Inc. is fully committed to establishing our manufacturing facilities in Green Charter Township, as has been discussed. In fact, we consider the project a “done deal.” We are finalizing all legal entity descriptions and Gotion is diligently moving forward in many different facets of this project, including:

1. Developing, planning, and finalizing the site plans;
2. Making a sourcing selection of the architectural engineering firm;
3. Ongoing due diligence work related to permitting and permit applications;
4. Interviewing candidates for multiple positions;
5. Preparing for a selective cut of timber to support site preparation once final permits are issued by the state;
6. Interacting with local officials to determine how Gotion can better serve the community through volunteer work and helping to fund key projects that were previously outside of the township’s budget; and
7. Working with local landowners and those who sold property to ensure their property values remain high and to ensure those who sold their homes have all support from Gotion to relocate with ample time to do so.

Thank you again for the support of Michigan government to help Gotion Inc. deliver on the committed 2,350 jobs and \$2.3 billion investment into the state of Michigan. You again have our assurance that at no time will Gotion ever attempt to enter into any area of political support or align with any offshore political ideals.

Best Regards,  
Chuck Thelen  
VP Gotion Global
